

126903 to 126966—Continued

126933. No. 95. From Huarmey, at the edge of a cottonfield at about 200 feet altitude. Fruits about $\frac{1}{2}$ inch in diameter.

126934. No. 108. From the market at Trujillo, December 17, 1937, but grown at Mache. Fruit a little larger than the previous collections.

126935. *LYCOPERSICON ESCULENTUM* Mill. **Tomato.**

No. 111. From near Samne, December 17, 1937, at about 6,000 feet altitude. Fruit of white type, dark green over the shoulders, with two main stripes of darker green; about $\frac{1}{2}$ inch in diameter.

126936. *LYCOPERSICON HIRSUTUM* Humb. and Bonpl.

No. 112. From just west of where the road forks for Otusco from the road to Huamachuca, at about 3,500 feet altitude. Plant coarse and hirsute; fruit not so hirsute as that of the coarse plant collected in the Santa Valley, and a trifle larger and more deeply colored around the stem end; about 1 inch in diameter.

126937. *LYCOPERSICON PIMPINELLIFOLIUM* (Jusl.) Mill.

No. 107. From the market at Trujillo, December 17, 1937, but grown at Mache. Plants not seen.

126938. *LYCOPERSICON PIMPINELLIFOLIUM* (Jusl.) Mill.

No. 106. From the market at Trujillo, December 17, 1937, but grown between Trujillo and Mache.

126939 to 126941. *LYCOPERSICON PIMPINELLIFOLIUM* (Jusl.) Mill.

126939. No. 105. From Santa, December 16, 1937. Plants growing at the border of a cottonfield. Fruit red, $\frac{1}{2}$ inch in diameter.

126940. No. 103. From Huamachuca, December 16, 1937, at about 100 feet altitude. Fruit red and about $\frac{1}{2}$ inch in diameter.

126941. No. 102. From fields north of Casma, December 16, 1937, at about 25 feet altitude. Plants growing in an abandoned cottonfield; fruit less than $\frac{1}{2}$ inch in diameter.

126942. *LYCOPERSICON ESCULENTUM* var. *CERASIFORME* (Dun.) A. Gray.

No. 70. Collected along the Rio Huallaga, just above Tingo Maria, at about 2,000 feet altitude. Fruit small, cherrylike; evidently an escape from cultivation.

126943. *LYCOPERSICON PIMPINELLIFOLIUM* (Jusl.) Mill.

No. 97. From Culebras, on the border of an irrigated area in an abandoned field at 300 feet altitude, December 15, 1937. Fruit small, red, about $\frac{1}{2}$ inch in diameter.

126944 to 126946. *LYCOPERSICON PERUVIANUM* (L.) Mill.

From Culebras, between 200 and 300 feet altitude, December 15, 1937. Collected in abandoned fields on the border of an irrigated area.

126944. No. 98. Fruit white with red glow over shoulders.

126945. No. 99. Fruit yellowish white with prominent yellow glow over shoulders.

126946. No. 100. Fruit large, yellowish.

126947 and 126948. *LYCOPERSICON PIMPINELLIFOLIUM* (Jusl.) Mill.

126947. No. 114. From the ruins of Chan Chan, December 18, 1937, at 200 feet altitude. Fruit small, red, about $\frac{1}{2}$ inch in diameter; currant type.

126948. No. 115. From the market at San Pedro, December 19, 1937. A wild plant with small pubescent fruits about $\frac{1}{2}$ inch in diameter.

126949. *LYCOPERSICON GLANDULOSUM* C. H. Mull.

No. 75. From a dry cliff west of San Mateo, at 9,500 feet altitude, December 5, 1937. Fruit yellowish green.
